

Dear Businessman,

Do you use computers in your office? If so...

Do you have a simple economic way of backing up your data WITH the ability to track your backups and use simple backup hardware like a second hard disk or USB Drive?

Would it be of interest to you to have a software program that provides backups like this without the need for backup tapes and RAID systems that are certainly more expensive and more complicated?

Let me take a few minutes of your time to explain a program called VirtualJudge to you.

I have created this program for the purpose of backing up folders with options of just adding, just updating, and even "pruning" files to the backup data location.

In addition, it logs every file it changes in the backup location and any problems it finds on the way.

It even keeps copying even if there is a copy error on one file, NOT like Windows copy, which will STOP copying if it runs into one file which is locked or unable to be copied.

The program can be run an extra time to prove that the original and backup copy are IDENTICAL to your satisfaction.

If you are interested in such a program for your office, please call or have your Administrative Assistant call me at 561-910-0906 or email me at software@compositionsdel.com

The price is no more than one doctor's visit, and the value you get from backing up your data safely, I hope, is worth it to you.

Included is time to show you how to setup the program, and how to easily kick it off. We will fully test your configuration. (Starting the program for a backup is something you or one of your assistants can do say, before going home at night, or whenever you need to.) Your VirtualJudge "House Call" is NOT complete until you are satisfied that it is working properly. If you have an adept "computer literate" assistant, you may not even need much help.

The program should not require upgrading, but if you wish a newer version, it can be provided to you at no additional charge.

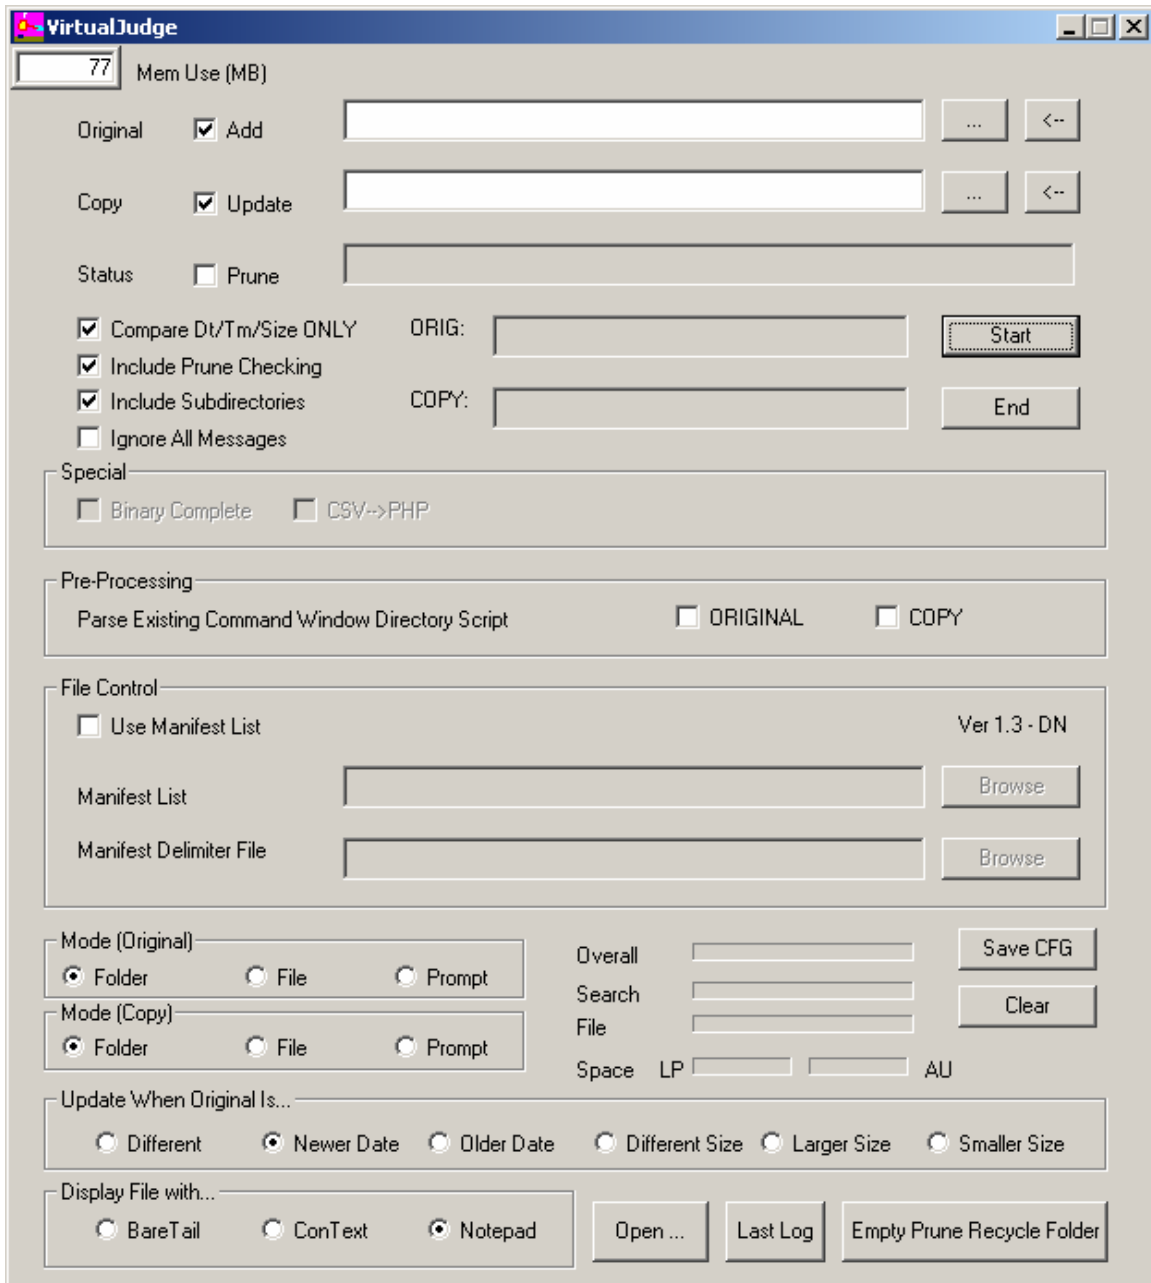

Please allow me to stop by when your office is not busy - I would love to set you up!

Sincerely,

Dale Neumann
